

*The Sustainable Solution*

## Acceptable Materials for Electronics Recycling

This list provides a general idea of the types of equipment T3 accepts for recycling. Please contact a sales representative if you have any questions on any equipment not listed.

### Computers and Peripherals:

CPU's, laptops, monitors, flat panels, keyboards, mice, cables, printers, plotters, external hard drives, tape drives, network hardware (i.e.: servers, routers, hubs), communication hardware (i.e.: modems), and subassemblies of any of the above.

### Data Center Equipment:

Power Distribution Units (PDU's), Uninterrupted Power Supplies (UPS Systems), and Motor Generator sets (MG sets).

### Household Appliances

Televisions, microwaves, stereos, and game consoles.

### Office and Telecommunications Equipment:

Copiers, fax machines, phone systems, cell phones, hand-held devices, projection equipment, audio equipment, video equipment, TVs, calculators, and security equipment.

### Test Equipment:

Commercially available (not customized) meters, scopes, etc.

### Laboratory and Medical Equipment:

T3 will accept used laboratory and medical equipment for recovery. We can also perform decontamination services.

### Do Not Accept:

T3 is not licensed to receive any hazardous waste or other inappropriate material. Significant penalties can be assessed by regulatory agencies against T3 for inappropriate shipments of hazardous waste.

Material not to be sent to T3 may include, but is not limited to:

- Pressurized gasses or liquids, such as aerosol cans
- Hazardous liquids, such as bottles of cleaning chemicals
- Hazardous powders, such as cans of molybdenum powder
- Hazardous semi-liquids, such as tubes of grease
- Charged defibrillators or other items posing extreme shock hazard

### Equipment contaminated with or containing:

- Chemicals not integral to the original, new equipment
- Ozone depleting chemicals (such as CFC's)
- Polychlorinated biphenyls (PCB's)
- Biological substances (such as blood, body fluids and other infectious substances)
- Biodegradable material that could become hazardous
- Asbestos (typically in insulation)
- Radioactive substances

Liquids and/or gases contained in or associated with equipment are not acceptable.
